**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23, drawn to tagging broadcast data, are classified in class 709, subclass 219.
  - II. Claims 24-26, drawn to collecting information about viewed content, are classified in class 709, subclass 224.

1. Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

2. In the instant case, invention I has separate utility such as tagging broadcast data to enable viewing permissions. Invention I can be used without collecting information about viewed content as utilized in invention II.

3. In the instant case, invention II has separate utility such as collecting information about viewed content. Invention II can be used without broadcasting packets as required in invention I. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
